PROFESSIONAL SUMMARY

Full-stack Developer with 2 years of experience in the IT industry, specializing in front-end and MERN stack technologies. Demonstrated success in delivering creative and robust solutions. Dedicated to enhancing team capabilities and driving project success through innovative skills. Poised to bring immediate value to your development initiatives.

WORK EXPERIENCE

Critical Mention an Onclusive Company April 2022 - Present

Full-Stack Web Development

As a Full Stack Developer, significant contributions were made to developing and maintaining web applications using Vue.js on the Front-end and Python Flask on the Back-end.

Tech Stack: Vue Js | JavaScript | Python | Flask | solr | AWS | MYSQL | Node js

Areas of responsibility:

- User experience: Created dynamic, responsive UIs with Vue.js, enhancing user engagement and interaction. Experienced in Node.js for server-side development.
- Code maintainability: Promoted code reusability and maintainability through Vue.js components.
- API development: Implemented robust RESTful APIs using Flask for seamless front-end/back-end communication.
- Functionality integration: Integrated third-party APIs (GIS) to provide valuable features and functionality.
- Testing and quality assurance: Wrote unit tests for comprehensive code coverage and collaborated with QA to deliver bug-free software.
- Performance optimization: Optimized database queries and implemented data migration scripts for enhanced performance.
- Version control and collaboration: Used Git for organized development and collaborated effectively with diverse teams.
- Cloud awareness: Possess a foundational understanding of AWS Cloud.
- Disaster recovery planning: Executed disaster recovery drills involving region migration (US West to East) and successful server startup, ensuring service continuity and minimizing downtime.
- Demonstrated a strong learning mindset by actively seeking out new challenges and opportunities to expand my skill set.

MASAI PROJECTS

Patreon Clone 🎧

Patreon is a membership platform that makes it easy for artists and creators to get paid

Features:

- Google auth implementation.
- Real-world library use like a text editor, color picker, etc.
- the creator can add their post.

Tech Stack: React Js | JavaScript | DOM | Node | MongoDB

Areas of responsibility:

- All creator Patreon pages where users can choose a currency, color, upload profile photos, cover photos, can post through the text editor.
- Arranging routes made site UX attractive.

A collaborative project built by a team of 4 executed in 6 days
